

## AWNING REPUBLIC AND OSRAM WORKING TOGETHER

The Ambient series is the culmination of over 2 years of research and development in collaboration with OSRAM to create a world leading low glare infrared solution. Utilising our extensive expertise and track record in the field of shortwave heating technology. The combination of experience from both sides has enabled us to bring to market the most effective low glare shortwave infrared heater available.

Laboratory tests show that the OSRAM Blackstar lamp produced approximately 15% less visible light (or glare) than the leading competitor for low glare heating.

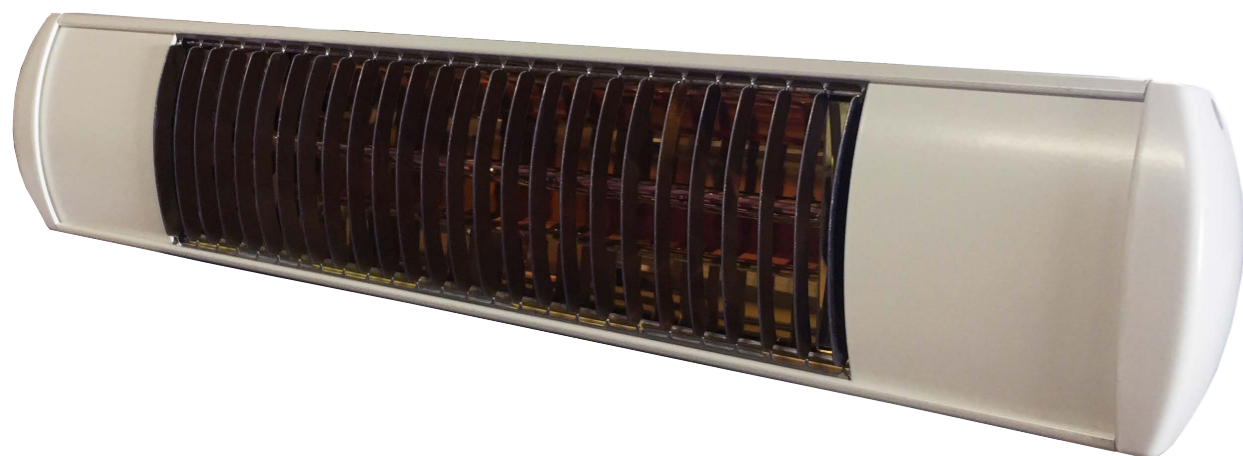

## DUAL LOW GLARE

Offering the only solution on the market with the combination of the gold reflector and the OSRAM premium Blackstar lamp. This 'dual' combination of the means the SOHO gives out the lowest light output (or glare), available from any shortwave infrared heater on the market.

## SOHO GOLD REFLECTOR

In addition to the highly polished smooth parabolic finish, the gold reflector absorbs the light from the heater, and as gold is the most reflective substance in the Infrared spectrum, it has the added benefit of further increasing the heat output.

## KEY FEATURES OF THE SOHO AMBIENT RANGE

- Unique dual low glare technology
- More heat, less light
- Compact and lightweight infrared heating system
- gold reflector technology
- Premium Osram 1500W Blackstar lamp, with superior heat to many inferior 2000W heaters
- Up to 25% energy saving compared to 2000W lamp
- Energy efficient
- 2 year warranty
- Weather durable IP55 rating
- Easy to install
- Range of brackets and fittings available
- Can be used with Tansun energy saving controllers
- Available is a selection of RAL colours if required
