

THE SHERATON

Retractable Waterproof Roof

THE SHERATON

The versatile, flexible and innovative retractable waterproof roof designed to withstand the elements and compliment any outdoor area.

The Sheraton Roof Range is made from architectural grade aluminium and stainless steel fixtures that have been developed to ensure smooth operation and high durability.

Utilising an architectural grade waterproof fabric and integrated water seals, the system can provide 100% rain protection.

Custom made to suit each individual area with a large range of fabric and powder coating colour options.

Folding away at the touch of a button, the Sheraton Roof Range is powered by a high torque motor drive system.

Optional recessed dimmable LED downlights and weather sensors.

THE SHERATON

Design Series

The Design Series is installed to an existing wall or supporting frame and is supplied with its own framework and front posts. The Design Series has no front beam or gutter, offering unobstructed views. For systems over 5m projection a slimline architectural aerofoil louvre fin is integrated along the front edge for structural support. Ideal for applications where the perfect outlook needs to be left undisturbed.

Novo / Smooth Series

The Novo/Smooth Series is anchored onto an existing wall or structure and is installed with its own framework, posts and integrated gutter system to offer motorised sun and rain protection for indoor/outdoor living. Ideal for larger areas, the Novo/Smooth Series can cover large areas in single systems or couple multiple systems side by side for greater flexibility.

Pure Series

The Pure Series offers the option to integrate the benefits of the Sheraton system into new or pre-existing structures for streamline appeal. Utilising a structure made of steel, wood or even stainless steel, the sleek design of this model offers endless possibilities and when incorporated together offers flexibility to work in with the surrounding architecture for unrivalled aesthetic appeal.
